THEORY OF THE EARTH

THE EARTH'S CRUST

The Earth's crust is the outermost layer of the planet, and is composed of the solid material that makes up the surface of the Earth. It is the layer of the Earth that we live on, and it is the layer that we see. The crust is the layer of the Earth that is the most visible to us, and it is the layer that we interact with most often. The crust is the layer of the Earth that is the most important to us, and it is the layer that we should study most carefully.
